A UNIQUE
APPROACH TO
ARCHITECTURAL
INTERIOR SPACES

uniq-wall
redefining spaces

WAVE

FOLDING PARTITION

Reimagine Your Space.

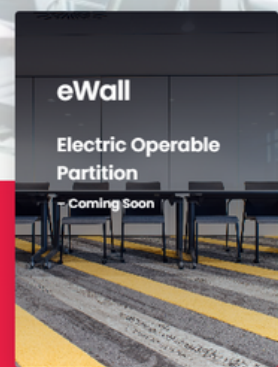

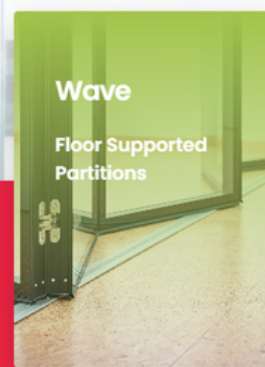

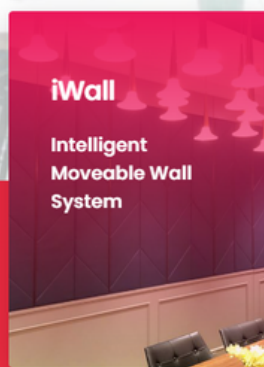

uniq-wall operable partitions are designed, not simply to optimize space, but to transform the way space is used. Customized so that clients have the freedom to choose configurations that best suite them, uniq-wall can help improve cultural, comfort and productivity.

Transform Your Environment.

Use space to spark creativity, collaboration, and comradery with uniq-wall. Not merely a solution for offices, uniq-wall can create visually and acoustically dynamic spaces for any venue, including restaurants, hospitals, event or meeting space.

Love Your Look.

Our code-compliant solutions include glass, solid, semi and fully automated wall systems, offered in a beautiful selection of finishes and designs with infinite potential to transform and maximize your space.

Acoustics

High Acoustical Performance:
50 – 55 STC

Finishes

Unlimited unique finishes for
both glass and solid panels

Operations

Manual or Fully Automated

Quick Installation

Smart design and technology
that allows quick installation

WAVE

FOLDING PARTITION

Challenging architectural spaces or load restrictions don't need to limit your creativity or flexibility. WAVE is our floor-supported partition concept developed to meet these challenges and provide you with options to transform your space.

WAVE offers variable configurations of panel arrangements or combinations of glass and solid panels.

Easy-to-operate, noise-reducing, WAVE is available in various customizable finishes.

- Acoustical performance of 45 STC
- Constructed using a discreet aluminum frame
- Invisible panel hinges
- Fully floor supported
- RAL powder coated or clear anodized frame finish
- Custom finishes: veneers, HPL, MFC, fabric , paint, glass and more

WAVE

FOLDING PARTITION

The WAVE floor supported operable wall system solves architectural challenges when overhead support and/or load restrictions are a factor. The WAVE system is a quick and easy to operate high performance acoustic partition constructed using a discreet aluminum frame that incorporates invisible hinges.

WAVE panels are customizable to meet the imagination and creative design intent of any architectural space. Panel finishes are available in a multitude of options: from back painted glass, to unique and exotic wood veneers, and HPL's (high pressure laminates). Individual panel finish applications can be customizable as well as variable configurations of panel arrangements or combinations of glass and solid panels.

Solid / Glazed

Invisible Hinges

AQUA

OPERABLE WALLS

AQUA's philosophy of precise engineering carries through to the internal mechanisms. Basic panels have extension rods within the frame and the final panel in a run features a telescopic nose in a solid material. Alternatively, an expanding jamb can be specified. All the seals, inclusive of the telescopic panel are electrically actuated with just the turn of a key

- Double-glazed walls with STC ratings up to 50 STC
- 6mm or 8mm tempered safety glass
- Single or twin point suspension systems with no floor track
- Multiple track configurations and stacking layouts
- E-Lock electric sound seal operation (top, bottom and expandable)
- Aluminum frames and steel subframes
- Optional inset, slim line pass door(s) with concealed hinges
- RAL powder coated or clear anodized frame finish
- Options available including back painted, smart film, electrically operated blinds, etc.
- Hardware options available

SOLITUDE

SOLID PARTITION PARTITION

[solitude]

Creating space within space.

[solil]tude walls were developed to optimize areas where space is at a premium. The walls glide smoothly on rollers along a top-hung aluminum rail without the need of a floor track and can create numerous room configurations that are flexible and highly responsive.

- Acoustical sound ratings up to 54 STC
- Single or twin point suspension systems with no floor track
- Multiple track configurations and stacking layouts
- E-Lock electric or Quick-Lock, manual half-turn sound seals
- Aluminum frames and steel subframes
- RAL powder coated or clear anodized frame finish
- Custom finishes veneers, HPL, MFC, fabric, paint, glass and more
- Optional inset, slim line pass door(s) with concealed hinges
- Hardware options available
